

Managed IT Services

Proactive. Secure. Reliable.

We provide comprehensive managed IT services that keep your business running, your data secure, and your team productive — so you can focus on what matters most.

Cybersecurity

Stop threats before they stop you.

We layer proven security solutions to protect your people, devices, and data from today's evolving threats.

- Next-generation endpoint detection & response (EDR)
- Email security + anti-phishing
- Firewall and network security
- Multi-factor authentication (MFA)
- SIEM and 24/7 Security Operations Center (SOC)

Backup & Disaster Recovery

Be ready. Stay operational.

We protect your critical data and ensure you can recover quickly when it matters most.

- Automated, secure backups (including Microsoft 365)
- Disaster recovery planning and testing
- Endpoint backup and recovery
- Flexible restore options

Cloud & Microsoft 365

Work smarter, from anywhere.

We help you get the most from Microsoft 365 and cloud technologies while keeping your data safe and accessible.

- Microsoft 365 setup, management and backup
- Cloud file and email protection
- Identity and access management (Entra ID)
- Cloud migration and optimization

Network Management

A stronger, more reliable foundation.

We monitor and manage your network to keep your business connected and running smoothly.

- 24/7 network monitoring
- Router, switch and firewall management
- Wireless and remote access
- Performance and capacity planning

Help Desk & Support

Real people. Fast solutions.

Our responsive help desk and on-site support keep your team productive and minimize downtime.

- Remote and on-site support
- Proactive system monitoring
- Fast issue resolution
- Friendly, knowledgeable technicians

Vulnerability & Patch Management

Close the gaps. Reduce the risk.

We identify and fix vulnerabilities before they become problems.

- Regular vulnerability scans
- Automated patching (OS, applications, devices)
- DNS filtering and web security
- Security best practice enforcement
